

# COMPASS TEST CENTRE

Do you have the required skills and capacity to develop a career as a professional pilot?

In today's aviation industry more airlines are using COMPASS and Pilot Aptitude tests for selection of flight crew. These tests are conducted by airlines such as Cathay Pacific, Emirates, British Airways, Qatar Airways, and many others. Not only are these tests conducted by major airlines, flight schools and training organisations are using these tests to select the right candidate for flight training.

The COMPASS computer based pilot aptitude testing system and the Checklist Professional Profile personality inventory system comprises a battery of tests that assesses suitability and aptitude for becoming a pilot. Comprehensive results are printed in an easy to understand format and may assist candidates with structuring cadetship and employment applications, résumés etc.

COMPASS	ADVANCED-COMPASS
Eye-hand-foot coordination	Complex Control Task (fly F/D etc)
Technical comprehension (physics questions)	ATPL theoretical questions on jet aircraft and operation
Short memory	Short memory
Mental arithmetic	Mental arithmetic
Spatial Orientation	Spatial Orientation
Multi-Tasking	Multi-Tasking

## CPP (Checklist Professional Profile):

CPP is a personality questionnaire designed to measure a broad range of personality traits that are important in the function of airline pilot. The questionnaire also comes with an automatically generated report, in which these traits are combined to form relevant competencies, such as stability, flexibility, selfdiscipline, team orientation, independence, leadership, assertiveness and more.

Aviation English – Verbal Reasoning Test is also available

You can take the tests here at our **AVIATION LEARNING CENTRE**

Call **1800 737 0800** for more details and pricing.
